## Sharing our Passion for Healthy Teeth

Dr Sam, Alison and Melody

have been out and about visiting local playgroups and childcare centres; showing the little ones and their parents how to look after their teeth by brushing correctly and with healthy eating.

Helpful tips about children's oral health:

- Before the first baby tooth appears, start massaging your babies gums. This will help them to accept you cleaning their teeth in the coming months and years
- No toothpaste is needed until the child is 18 months of age, cold water will do until then
- A child needs help to brush their teeth until the age of about eight as their hands are not dexterous enough to manage alone

Special thanks to the playgroups and childcare centres that we have visited. We hope everyone enjoyed our visit as much as we did and that we were able to give them a few ideas on how to look after those precious baby teeth.

If you have any questions or concerns regarding your child's teeth please give us a call and we will happily help you. We can also check to see if your child is eligible for the Medicare \$1000 Children's Dental Benefit Schedule.

## Free Dental Consultation Community Event

Saturday 23 March 2019  
CUA (Credit Union Australia)  
Westfield Shopping Centre  
10.00am until 2.00pm

We are giving residents the opportunity to come in and have a chat with a dentist in a relaxed environment, cost and obligation free. This is ideal for those too nervous to go to a dental practice - come in and just talk to us about your concerns and fears. We can work out a plan and help you achieve the smile you were always too frightened to wish for. This is a great opportunity for people who may have questions about looking after their teeth, parents who want to ask about thumb sucking or dummies, or for anyone who has a specific concern they would like to ask us about.
