## The Benefits of a Regular Dental Exam and Clean

Is it time your teeth had a Spring Clean? We all regularly book our cars in for a full service and oil change and usually Spring is the time we give our homes that massive big clean we avoid for the rest of the year. Spring is also the perfect time to book in for an exam and clean with your dentist and get your smile Summer ready.

Dentists usually recommend an exam and clean every six months, this allows your dentist to detect any problems at an early stage. A thorough clean is essential to maintaining healthy gums. If left for longer periods the hard calculus that builds up on teeth can irritate the gum and cause periodontal disease. Over time the inflamed gums will result in the loss of the bone that supports the tooth, the tooth (or teeth) may then become loose. Sadly, once this bone is gone there is little a dentist can do and in extreme cases the tooth needs to be removed. Regular exam and cleans to remove this calculus will help ensure you retain your teeth and smile for longer

Your mouth and teeth feel lovely after a professional clean and look brighter, but the real benefits lie below the gum. If you find that your gums sometimes bleed when you brush them it might be time for a visit to your dentist. Bleeding gums are an early sign of gum disease. We find patients tend to reduce their brushing when their gums bleed when in fact it is a sign that you need to brush more! A thorough dental exam and clean can take up to an hour to complete when done correctly. This is one hour out of your week that just may help save your smile!

## Facebook

Our Passion Family Dental North Lakes Facebook page is another great way to find out more about the latest in dental technologies and receive helpful tips on how to look after your smile and improve your overall oral health. Head on over and "like" our page to ensure you keep in touch with all the latest dental news.

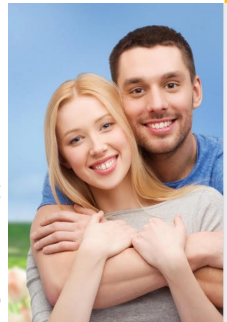

## Spring Teeth Whitening \$299

Is it time to brighten your smile?

Wouldn't it be nice to have a brighter, whiter smile for Spring? We have the perfect solution!

We are offering a teeth whitening take-home package that includes a consultation with your dentist, a take-home Professional Teeth Whitening Kit and custom-fitted mouth trays for both upper and lower teeth/jaws.

With any teeth whitening system it is important to consider having a dental exam and clean prior to commencing treatment - there is no point trying to whiten the heavy calculus that builds up on our teeth, and it can be sensitive to have whitening treatments if you have decay.
