We are very pleased to introduce Dr Soni to the practice. Dr Soni is very much a people person and loves helping others. Having studied in the same Adelaide university as Dr Sam, he is a very understanding and talented dentist. Patients who have already met him are truly appreciating his warmth and high levels of skills.

Dr Soni is particularly skilled at cosmetic treatments such as crowns and veneers. If you have been thinking of enhancing the appearance of your smile then Dr Soni is the perfect person to help you.

Dr Soni is also very passionate about doing root canal treatments, he likes to help patients save teeth that would otherwise have to be extracted. With his caring and gently touch you are in safe hands as he carries out this treatment. So many people get cold shivers when dentists recommend root canal treatments but with Dr Soni you can relax knowing that he will make sure you are fully comfortable at all times.

We would like to take this opportunity to officially welcome Dr Soni to Passion Family Dental. We are sure our patients are going to enjoy the energy and enthusiasm he brings to the practice.

What is a Dental Crown?

Dental crowns, also called a cap, is a restoration that completely covers the tooth, in a similar way that a helmet covers our head. They are usually made from a very strong porcelain material that is made to look just like a natural tooth.

A dentist will normally suggest you need a crown if a tooth has a large filling or cracks, has previously been root canal treated or if a tooth is discoloured or worn. Sometimes crowns (or their smaller cousin the veneer) are placed to correct minor crowding issues or misaligned teeth. Veneers are very similar to a crown but don't cover the complete tooth, only the surfaces that are visible when we smile.

If you want to preserve a heavily filled tooth or if you want to achieve the perfect Hollywood smile, then maybe a crown is the answer. Come in for a **free consultation** and have a chat with Dr Sam or Dr Soni about your options!

Children's Dental Benefit Scheme

The Children's Dental Benefits Scheme (CBDS) is a Medicare program for eligible children aged two to 17 years of age. Up to \$1000 is provided over two consecutive calendar years for dental treatments such as exams, cleans, x-rays and fillings.

Who Is Eligible? CBDS eligibility is assessed each calendar year - a child must be aged 2 to 17 years for a least one day of the calendar year, eligible for Medicare, and receive Family Tax Benefit Part A or other Australian government payment.

At Passion Family Dental North Lakes, we want your child build a lifelong confident association with the dentist. We are happy to bulk bill treatments that are eligible under the CBDS. Call us on 3465 1199 to see if your child qualifies for this free treatment!
