

Enjoying Life!

Smile Makeover

In this issue:

- A New You
- Healthy Habits
- Dr Soni is Back

Studies have shown that a person is generally more confident if they are happy with the appearance of their teeth. They will smile more often and be more outgoing; they are more likely to make a great first impression and therefore more likely to land their dream job.

If you avoid smiling or cover your mouth when speaking it may be possible that your dentist can help you improve not only your smile, but also your outlook on life.

At Passion Family Dental North Lakes, we are fortunate to have Dr Soni as part of our team. Dr Soni's passion is restoring patients smiles. Sometimes a simple clean or filling is all that is required. Sometimes we need Dr Soni to use his amazing skills, and his attention to detail, to work some dental magic and design a brighter new smile.

If you have minor crowding or mis-shaped teeth, cracked, chipped or broken teeth, or maybe your teeth are not as white as they used to be, then come in for a chat with Dr Soni to see what needs to be done to help you achieve a dazzling new smile.

Healthy Habits for Kids

Teaching children how to look after their teeth from an early age is a great way to ensure they will develop lifelong healthy habits.

Make sure your children are brushing their teeth for two minutes twice a day and flossing at least two or three times a week. Get them to brush as they listen to their favourite songs or download one of the many tooth brushing apps; try to make tooth brushing fun rather than a chore. Remind them that we brush using little circles and need to brush every single tooth—don't forget the ones right up the back!

When playing contact sports children need good fitting mouthguards to help protect their teeth. At Passion Family Dental North Lakes we can make our mouthguard in a number of different colours and patterns to make them more appealing to wear.

Teach your child the difference between good and bad foods. Help them understand that some foods create acids that can damage their teeth so they can only have them 'sometimes'.

Regular visits to the dentist from a young age will also help your child grow into a confident dental patient. Let them see that going to the dentist is fun! This way we can keep an eye on things and alert parents to potential problems early.

Most importantly, set a good example! Children learn most of their habits from watching parents so make sure your children see that you have healthy habits too.

Call us to see if your child is eligible for free dental treatment using Medicare's Children Dental Benefits Scheme.

Celebrating Dr Soni

Welcome Back Dr Soni—we have all missed you!

We are excited to announce that Dr Soni is back! Thank you to the patients who have been waiting patiently for Dr Soni to return, we can now book you in to see him! Dr Soni perfectly compliments Dr Sam in the treatments he provides, so our patients can feel confident they will receive a high standard of care and services at all times. Dr Soni is highly experienced in crowns and veneers and can help you achieve a stunning smile!
